

## Belimed PH820 / PH840 / PH860

Belimed PH Washers offer a perfect, hygienic design for all life science applications

### Features

- Belimed’s Life Science PH range of cleaning systems range from 1.5 m2 floor area through to 4.8 m2 floor area or can even be customised to suit your specific needs.
- All Belimed Life Science PH washers feature the most modern control systems, from Siemens or Allen Bradley. Offering intuitive access, relevant visible data, simple operation through programmable operation and MES/SCADA system integration into a network.
- Belimed’s PH series offers a family of washers that are optimally adapted to the rational functional sequence in a professional pharmaceutical process.
- Belimed Life Science PH washers benefit from a uniform washing and machine concept and differ mainly in chamber size. The PH820.2, PH820.2H and PH840.2 offer one rotating washing arm at the top and bottom of the chamber. The PH860.2 and PH860.2L are each equipped with two washing arms due to the longer chamber design. The overlapping rotation ensures an uninterrupted spray surface.
- Offering 5 standard chamber sizes, systems with special dimensions on request, 1 or 2 doors, maintenance room on right or left side, rack specific to wash item and installation in clean rooms with gastight partition wall, you can rest assured Belimed has a wash solution for your specific needs.
- Belimed Life Science PH washers offer a large field of application for washing and drying such as:
  - Bottles (eg. Bulkhead)
  - Tray plates
  - Jugs
  - Funnels
  - Machine parts
  - Hoses
  - Fittings
  - Barrels
  - Containers
  - Much more
- Belimed offers a wide range of modernisation and retrofit measures to optimise functionality and efficiency while reducing the risk of interruptions or downtimes.

Product Code	Product Description	Pack Size	Quote
B-PH820.2-V-1	Belimed PH820 Pharmaceuticals Washer, Vertical, 1 Door	ea	

Product Code	Product Description	Pack Size	Quote
