LIQUID FILTER HOUSINGS

Process Filtration

Stainless steel liquid filtration housings.

Donaldson® P-FG filter housings are designed for filtration of liquids such as process water, mineral water, beer, wine, soft drinks, juice and other liquids.

Donaldson's standard P-FG is built using 304 stainless steel. It is mill finished inside with a two-part paint exterior. The housing is equipped with two pressure gauges and either FNPT or Flanged connections, depending on the housing size. The housing is equipped with a vent and clean and dirty drain ports. Our broad selection of filter elements will meet the requirements of your process.

P-FG filter housings are also available in 316 stainless steel as well as with ASME. Our seven standard sizes offer a wide range of capacity depending on element selection. Custom housings are available upon request.

P-FG

SPECIFICATIONS

MATERIALS

Housing Material	304L SS (316L SS available upon request)
Gasket Material	EPDM (other materials available upon request)

CONNECTION TYPES

0050-0250	FNPT
0450-1000	ANSI/ASME Flange, Class 150

DESIGN PRESSURE AND TEMPERATURE

10.4 bar @ 149° C (150 psig @ 300° F) with EPDM gaskets

SURFACE FINISH

Inner	Mill finish stainless steel
Outer	Bead blast

MAXIMUM INLET TEMPERATURE

Up to 149° C (300° F)

DIMENSIONS

P-FG 0050-0250

P-FG 0450

P-FG 0700 and 1000
